Network Notifications

Your 4G LTE® wireless device will indicate which of the AT&T wireless networks you are connected to. A network indicator does not necessarily mean that you will experience any particular upload or download data speeds.

-  Connected to the AT&T 4G LTE network.
-  Connected to the AT&T HSPA+ network. The AT&T HSPA+ network is capable of delivering 4G speeds when combined with enhanced backhaul. 4G availability is increasing with ongoing backhaul deployment.
-  Connected to the AT&T EDGE/2G network.

Actual data upload and download speeds depend on various factors, including the device, network utilization, file characteristics, terrain, etc. Learn more at: wireless.att.com/learn/articles-resources/wireless-terms.jsp, your AT&T Wireless Customer Agreement, Section 3.2 Where and How Does AT&T Service Work?

4G LTE not available everywhere. LTE is a trademark of ETSI. Learn more at att.com/network.
